PROFESSIONAL SUMMARY

Senior frontend and mobile engineer with 4+ years of experience building and shipping production web and mobile applications across fintech, proptech, mobility, and marketplace products. Specialized in React, React Native, and TypeScript, with multiple apps published to the App Store and Google Play. Experienced owning mobile delivery end to end, from architecture and state management through release, monitoring, and post-launch stability, including raising crash-free sessions to 99.2% and supporting platforms processing 10,000+ transactions per month at 99.9% uptime. Comfortable working across native layers in Kotlin and Swift, integrating payment and real-time APIs, and collaborating closely with design and product teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Kotlin, Swift, Java, C#, SQL

Frontend: React, React.js, Next.js, Vue.js, Angular, Redux, Redux Toolkit, Tailwind CSS, HTML5, CSS3, responsive design, web performance optimization

Mobile: React Native, Expo, Flutter, Jetpack Compose, SwiftUI, Android, iOS, App Store and Google Play deployment, push notifications, ExoPlayer, Google Maps API

Backend and Data: Supabase, Supabase Edge Functions, Firebase, REST APIs, WebSockets, MongoDB, Redis, SQL

Payments and Integrations: Stripe API, PayPal API, in-app payments, wallet and transaction systems, third-party API integration

Tooling and Practices: Git, GitHub Actions, CI/CD, Vite, Sentry, Figma, Agile development, code review, debugging and performance profiling, unit and integration testing

PROFESSIONAL EXPERIENCE

Mobile Engineer (Contract), Glamogram

May 2026 – Present

Remote | Scheduling and payments platform for beauty businesses | glamogram.com

- Built the official Android and iOS application, including the client-facing appointment booking flow.
- Implemented in-app payment collection and admin automation tooling for beauty business owners.
- Stack: React Native, Expo, TypeScript, Redux.

Software Engineer (Part-time), Incenvia

Mar 2026 – Present

Remote | Global talent outsourcing platform for vetted remote engineering, design, and product talent | incenvia.com

- Building Kabu, a premium chauffeur and car rental marketplace mobile app for the Lagos market, now under review on the App Store and Google Play.
- Developed the end-to-end rider booking flow, covering destination entry, ride and driver-hire selection, and live trip tracking.
- Stack: React Native, TypeScript, Redux.

Mobile Engineer, Baye Capital

Feb 2026 – Present

Remote | African venture studio building mobile products for its portfolio ventures | bayecapital.com

- Building the mobile application for Buildsure, a proptech venture under the studio model, covering property listing, search, and viewing-scheduling flows.
- Own frontend architecture and state management for the app, working directly with product and design on user-facing flows.
- Stack: React Native, TypeScript, Redux.

Software Engineer (Contract), Talstrike

Jun 2026 – Aug 2026

Remote | Sports networking platform connecting athletes, coaches, and scouts worldwide | talstrike.com

- Resolved critical production bugs in the V1 mobile app, improving stability for athlete and scout users.
- Scoped and kickstarted the technical build-out of Talstrike V2, defining architecture for the next release.
- Stack: React Native, TypeScript, Redux.

Software Developer, Swiftpoint

Jun 2025 – Jan 2026

Remote | Fintech payment platform for bill pay, airtime, and merchant payments across Africa | swiftpoint.io

- Led mobile development end to end, from architecture through release to the App Store and Google Play, improving crash-free sessions to 99.2%.
- Built a role-based admin dashboard for transaction monitoring and reconciliation, integrating APIs averaging under 2 seconds per transaction.
- Redesigned onboarding and wallet flows, increasing active user retention by 25% and reducing support complaints by 30%.
- Stack: React Native, Expo, Redux Toolkit, TypeScript, Kotlin, Swift.

Mobile Developer (Contract), NidiDrive

Aug 2025 – Nov 2025

Remote | Ride-hailing platform | nididrive.com

- Reduced crash rates by 40% and cut app load times by 35% through targeted debugging, profiling, and refactoring.
- Implemented real-time location tracking and push notifications, increasing daily active users by 20%.
- Stack: React Native, TypeScript, Firebase, Google Maps API.

Software Developer, Blockspace Technologies

Nov 2024 – Apr 2025

Remote | Blockchain B2B remittance platform handling \$70,000+ monthly volume across 4+ currencies | blockex.trade

- Built the frontend and a serverless Supabase backend processing 10,000+ transactions per month at 99.9% uptime.
- Implemented secure authentication and wallet management, reducing fraud incidents by 40%.
- Stack: React, Supabase Edge Functions, Tailwind CSS, Capacitor.

Software Engineer, Tsaron Technologies

Nov 2023 – Aug 2024

Remote | tsaron.com

- Built Gumshoe, a Kotlin Android application detecting driver distraction via acoustic signals, with Redux-managed real-time data streams.
- Delivered Loveletter, a CCTV-based crash subrogation web tool, and Blackbox, a Vue.js fleet management system.
- Stack: Kotlin, Redux, Vue.js, Tailwind CSS.

Software Developer, ItsPaydai

Feb 2023 – Sep 2023

Remote | Automated commission management and payment automation platform | itspaydai.com

- Built the core commission engine and a real-time payment tracking dashboard integrating Stripe and PayPal.
- Reduced payment processing time by 75% through end-to-end automation.
- Stack: React, Redux, Stripe API, PayPal API, WebSockets.

Software Developer, MO Group

Feb 2022 – Oct 2022

Lagos, Nigeria | proptibaank.com

- Built Proptibaank, a cross-platform fractional real-estate investment app in React and React Native, improving engagement by 30% and cutting bundle size by 40% using Vite.
- Built Moonlight, an Android TV entertainment app using Jetpack Compose and ExoPlayer for lean-back media browsing.
- Stack: React, React Native, Jetpack Compose, Kotlin, Vite.

EDUCATION

University of Lagos | Technology Education, Automobile and Mechanical Technology | Jan 2021 – Feb 2026

Relevant coursework: Science of Materials, AutoCAD, Design, Mechatronics, Electrical Circuits.
